

To whom it may concern at the FCC:

I use my XM radio service constantly, at home, work, and in my car, and I don't use FM at all anymore due to the excessive commercials, limited playlist, and inferior sound quality. XM radio will be providing traffic and weather for Minneapolis very soon and I am looking forward to being able to use it. I pay for this service and I feel that XM radio ought to be able to provide what its' customers want and that includes weather and traffic for specific regions or urban areas. Please don't make XM stop providing this! Thanks for your time.
